

Steel service center in El Puig, Spain, now wholly owned by thyssenkrupp

In July 2016 thyssenkrupp Materials Processing Europe GmbH acquired its former investee company Thyssen Ros Casares S.A. in southeastern Spain. The Krefeld-based processing specialist is systematically pursuing its growth strategy with the integration of the site in El Puig, which is now trading under the name thyssenkrupp Materials Processing. Since spring, the Europe-wide service center network has already been boosted by the addition of a new location in Győr, Hungary, and the stainless steel service center in Willich, Germany.

On the site north of Valencia covering a total area of 39,000 m², slit strip and blanks can be processed on three slitting and two cut-to-length lines. The product range is tailored to individual customer wishes, comprising hot- and cold-rolled, coated carbon and stainless steels. The good logistical connections from the El Puig site guarantee quick access to key customer segments.

“We are delighted to be able to expand our European network with the El Puig site and offer our customers new options with a further presence in a promising market environment,” says Marcus Wöhl, CEO thyssenkrupp Materials Processing Europe.

About us

With about 480 locations in more than 40 countries, the Materials Services business area specializes in materials distribution, logistics and services, the provision of technical services as well as services for industrial plants and steel mills. In addition to rolled steel, stainless steel, tubes and pipes, nonferrous metals, specialty materials and plastics, Materials Services also offers services from processing and logistics to warehouse and inventory management through to supply chain and project management.

thyssenkrupp is a diversified industrial group with traditional strengths in materials and a growing share of capital goods and services businesses. Around 155,000 employees in nearly 80 countries work with passion and technological expertise to develop high-quality products and intelligent industrial processes and services for sustainable progress. Their skills and commitment are the basis of our success. In fiscal year 2014/2015 thyssenkrupp generated sales of around €43 billion.

Together with our customers we develop competitive solutions for the challenges of the future in the areas Mechanical, Plant and Materials. With our engineering expertise we enable our customers to gain an edge in the global market and manufacture innovative products in a cost- and resource-friendly way. For us, technical progress and innovations, allied with the combined strength of the Group, are key factors enabling us to meet current and future customer and market requirements around the world, grow on the markets of the future, and generate strong and stable earnings, cash flows and value growth.
